

## Choosing the perfect shower

Our friendly staff and/or your plumber will help you with the practicalities of installation, but to help and assist you in your choice we have explained below the main domestic water supply systems. Simply look at the system you have in place in your home and then follow the chart to see which shower is right for you.

## Difference in showers

The difference between electric pumped and non-pumped showers is:

- (A) Pumped showers are taken off a cold water supply from the storage tank.
- (B) Non-pumped showers are taken off the mains water supply.

All electrical shower valves (pumped and non-pumped) work on the same principle,

- The slower the water, the hotter it gets or vice versa
- The faster the water, the colder it gets.

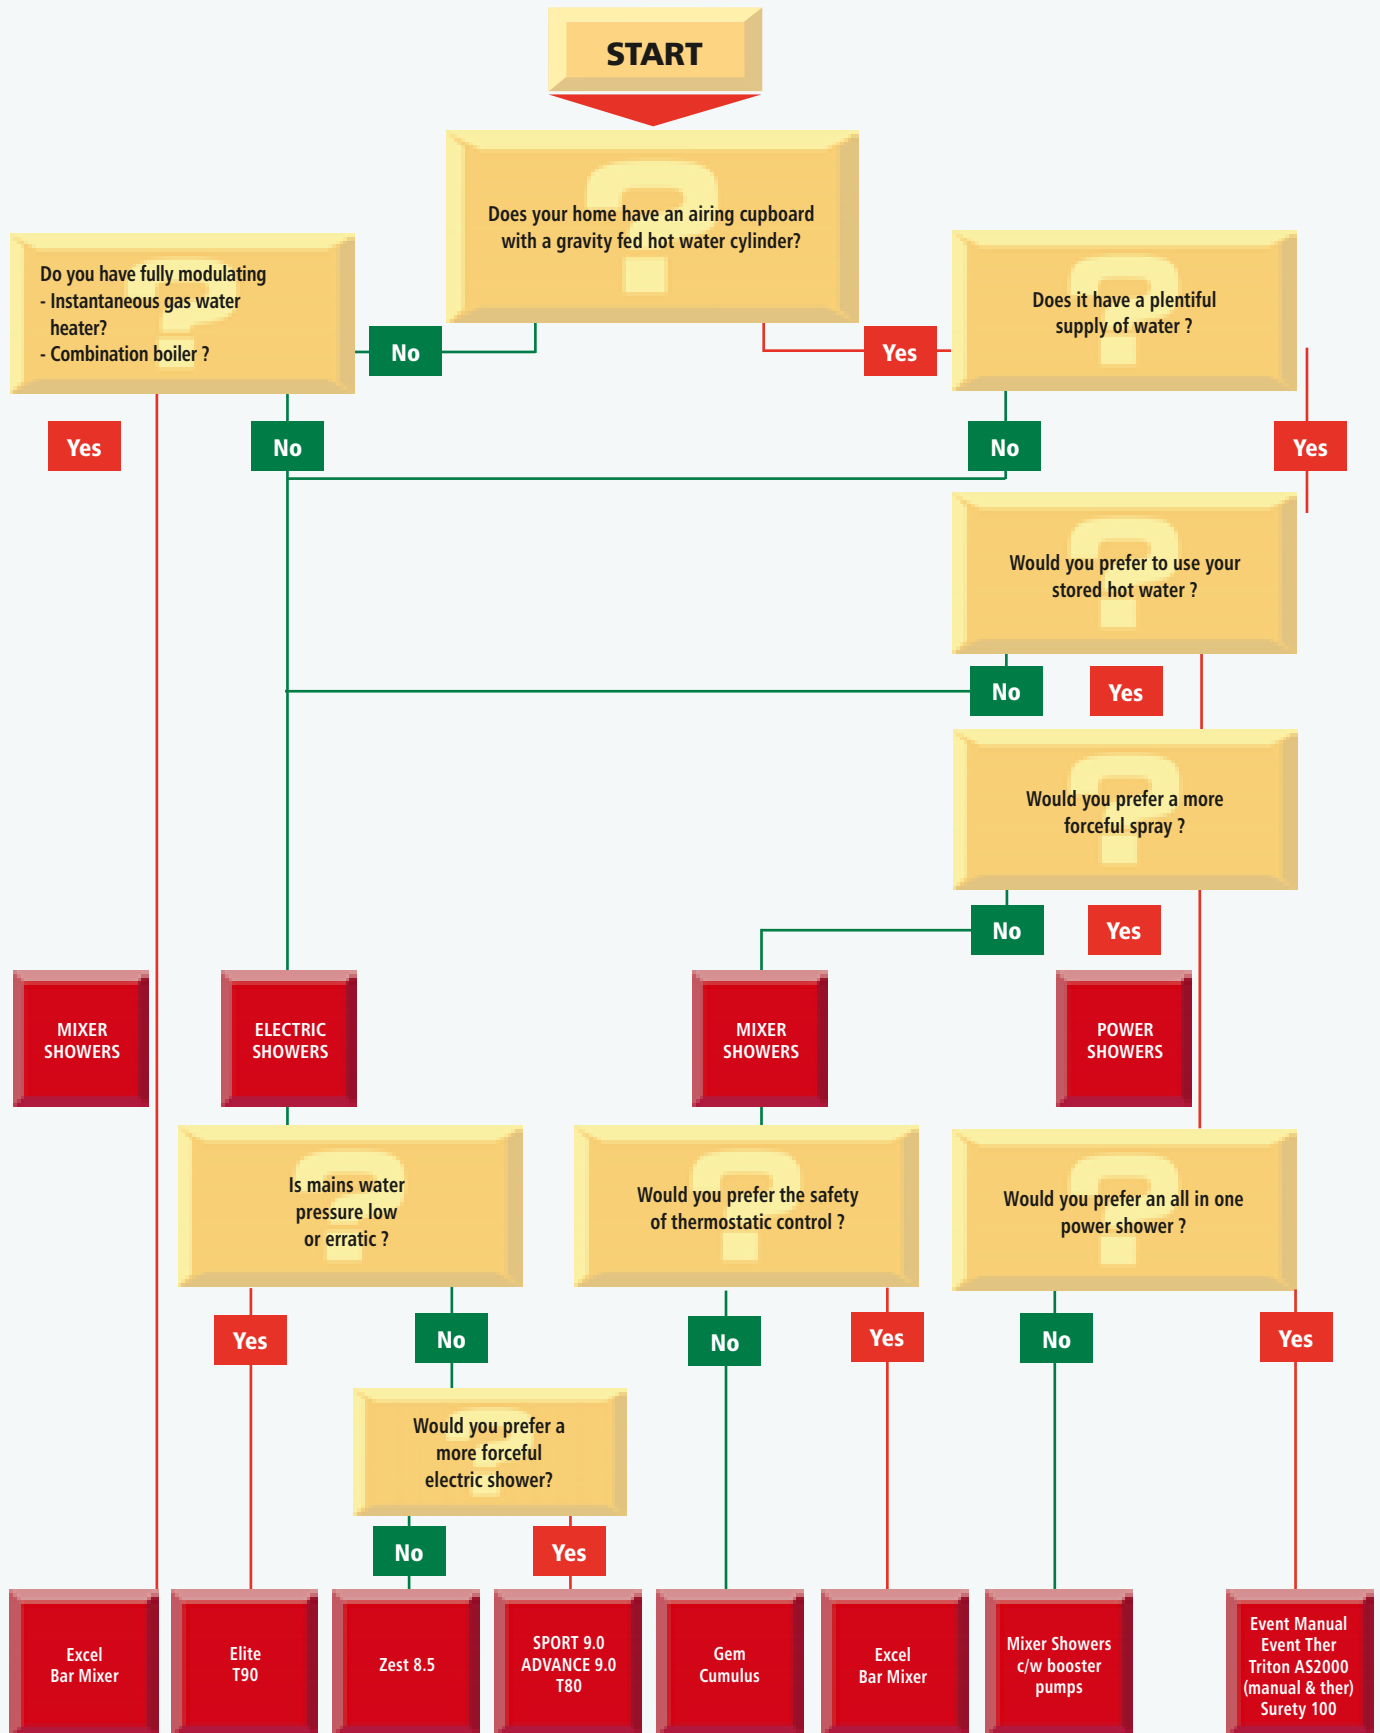

There is a major misconception by the general public that a pumped electric shower will give a better showering experience than a non-pumped electric shower. This is not true. There is actually no difference in performance.

Some people also think that a pumped electric shower is a power shower. This too is incorrect.

Whether you are specifying products for domestic, commercial and industrial environments, leisure centres, healthcare sector or special care, Heat Merchants offers a comprehensive range of safe, practical and easy to install plumbing solutions.

Choice and flexibility are key in the process. That is why we at Heat Merchants believe in providing a wide range of showers. From electric, manual controls, to pressure balancing valves and thermostatic showers with body jets, we have it all at Heat Merchants.

# Shower Selection Chart

For all installation requirements consult the appropriate installation, operation and maintenance guide.

Shower Type	Name	Pros	Cons	Extras	Comments
Pumped electric	Mira Elite Triton T90xr	Easily fitted; most common type	Poor performance in winter Noisy on partition walls		Not suitable for hard water areas
Mains electric	Mira Sport Triton 80	Silent - no pump	Poor performance in winter Relies on even water pressure		Cheaper than pumped electric. Not suitable for hard water
Manual mixing shower	Mira GEM Sirrus Cumulus	Cheapest of the mixing showers	No anti-scald	Booster pump	The exposed type is better for servicing
Thermostatic mixing shower	Mira Excel	Safety anti-scald	Costly	Booster pump	Costly - but there's peace of mind
Pumped mixing shower - manual	Mira Bar Mixer & Triton AS2000 Super Jet	Costs less than a separate pump	Noisy on partition walls	Surrey Flange	Can use a lot of hot water
Pumped mixing shower - thermostatic	Mira Event & Triton AS2000 	Costs less than modular power shower	Costly & high noise level	Surrey Flange	Can use a lot of hot water

## Other Points to Note

All showers with booster pumps or pumps fitted will use approximately 3-4 times more hot water than gravity systems. A Surrey flange may also be required to stop aeration.

Sirrus manual and thermostatic showers can both be pumped from unequal water pressure, e. g. mains cold, gravity hot.

A Surrey flange is a fitting for the top of the hot water cylinder. This device allows pumped hot water to be drawn to the shower directly.

Thermostatic showers have the ability of holding the water temperature at a fixed level, even if the flow rates change in the supply.

Care should be taken in relation to the hot water cylinder capacity when sizing or adding a booster pump, e. g. 1 x 3 bar booster pump with 2 showers, the cylinder should be at least 35-40 gallon in capacity.

There has also been a phenomenal growth in the power shower market. We recommend the use of an unvented cylinder for the best showering experience.

# Electric Showers

## Electric Showers - Non-Pumped

Electric showering means instant showering at any time by heating the cold water supply. All electric showers combine the best in design with simple and clear controls for easy operation. Temperature changes are smooth and accurate. Simple ON/OFF switching removes the need to reset the temperature each time the shower is turned on.

### Mira Sport 9.0kw

- 9kw @ 230v rated mains water shower
- Separate power & flow/temperature controls for ease of use
- Stop/start button separate from power selection
- Delayed turn off, safer shower for next user & lower limescale build up
- Two indicator lights, power & low flow, indicating a need for service
- Shower cuts off if too hot
- Brass inlet connector with integral earth bonding
- Cold water inlet on middle RHS

Code: D60582 - (9kw WH/CP)

### Triton T80 XR

- 8.5kw @ 230v rated mains water shower
- 1/2" cold main supply with min. pressure 1 bar & max. static head of 10 bar
- Temperature control with numbered dial for easy control
- Low pressure indicator, to light when water pressure drops
- Operates on the principle that the faster the water flows the colder it gets and vice versa
- Cold water inlet on right hand side corner

Code : D72107

### Mira Zest 8.5kw

- 8.5kw @ 230v rated mains water shower
- Separate power & flow/temp controls for ease of use
- Delayed turn off, safer showering for next user and low limescale build-up
- Shower will turn off if temperature becomes too hot
- Min. maintained pressure 0.7 bar
- Can be fed from top, bottom or back with water pipe

Code : D60571

## Electric Showers - Pumped

Electric showering means instant showering at any time by heating the cold water supply. Even if the water supply is unreliable, you can still enjoy these benefits with a tank fed pumped electric shower. Both Mira and Triton showers combine the best in design with simple and clear controls for easy operation. Temperature changes are smooth and accurate. Simple ON/OFF switching removes the need to reset the temperature each time the shower is turned on.

### Mira Elite ST

- 9.0kw pumped electric shower
- Quiet, integral mains voltage pump
- Smooth, single turn temperature control
- 3 power settings, full, half (economy summer) and cool
- Separate power & flow temperature controls
- Patented flow regulator provides smooth temperature increase with no rapid change
- Multiple water and cable entries
- Brass inlet connector with integral earth bonding
- Cold water inlet on left hand side bottom

---

Code: U21081

---

### Triton T90XR

- 8.5kw pumped electric shower
- Cold water supply is gravity fed from the cold water tank (min. capacity 25 gal)
- Max. head is 30ft and min. is 3ft measured from top of shower box to bottom of tank
- There must be no other products on the supply from tank to shower
- Water remains virtually constant even if a tap is turned on
- Water connection is on the left hand side bottom

---

Code: U41263

---

## Power Showers

As the name suggests, power showers produce a more impressive spray force than either electric or gravity fed mixer showers. This is because the water pressure is boosted by a pump to produce exceptionally powerful flow rates.

### Surety Thermostatic

Power Shower  
 High flowing power shower that delivers up to 12 litres of water per minute  
 Continuously rated motor  
 Thermostatically controlled  
 Separate on/off temperature control  
 Modern design riser rail with multi-function handset  
 2 year guarantee

Code:

U42382

### Triton AS2000

- Shower available in manual or thermostatic
- Independent temperature & flow controls
- Maximum temperature stop with override button for added safety
- Available in a range of colours and finishes
- Water inlets on top right corner on shower valve
- Available in chrome & called an Aspirante

Code: U39808 - Manual

Code: U39809 - Thermostatic

### Mira Event - Thermostatic or Manual

- Available as manual or thermostatic
- All in one power shower with integral 230v pump & mixer assembly
- Separate pressure and temperature control knobs
- 15mm dual entry push fit inlet connections
- Manual version has maximum temperature stop
- Manual version generates up to 14l/min @ 0.7 bar
- Thermostatic version has push button stop/start and override max. temp. stop
- Generates up to 16 l/min @ 0.7 bar

Code: D59552 - Manual

Code: D59556 - Thermostatic

The Atlantis range of showers is available with a number of different options. There is a high and low pressure option and also an exposed or concealed version. The low/high pressure option offers a choice of shower heads which converts the shower from a high pressure to low pressure or vice versa. When ordering please state your preference.

## Exposed Thermostatic Valve & Kit

Low pressure handset

High pressure handset

Wall mounted elbow fitting

### Europe Kit

- 22mm sliding rail
- Double interlock hose
- Soap dish
- Hose retaining ring

- New valve suitable for all combi systems with high or low pressure kit
- All high pressure systems with high or low pressure kit
- All gravity systems minimum 6ft recommended head with low pressure kit
- Flow rate 7 l/min @ 0.1 bar, 12 l/min @ 0.2 bar, 15 l/min @ 0.4 bar, 25 l/min @ 1 bar, 35 l/min @ 2 bar

### Handsets

- High pressure 5 mode or low pressure
- Easy clean

### Options

- Exposed valve and high pressure kit
- Exposed valve and low pressure kit
- Available in chrome or gold finishes
- Elbow and sprout available to convert to bath shower mixer

Code: U80192 Exposed valve

Code: U79465 Slide rail kit

Code: U80194 Headset - chrome

## Concealed Valve

Low pressure handset

High pressure handset

Ideal No7 kit c/w 3 mode spray

Standard small shower head (shown with shower arm)

Wall mounted

### Europe Kit

- 22mm sliding rail
- Double interlock hose
- Soap dish
- Hose retaining ring
- Wall outlet

- New valve suitable for all combi systems with high or low pressure kit.
- All high pressure systems with high or low pressure kit
- All gravity systems minimum 6ft recommended head with low pressure kit
- Flow rate 7 l/min @ 0.1 bar, 12 l/min @ 0.2 bar, 15 l/min @ 0.4 bar, 25 l/min @ 1 bar, 35 l/min @ 2 bar

### Handsets

- High pressure 5 mode or low pressure
- Easy clean

### Options

- Concealed valve and high pressure slide rail kit (wall outlet included)
- Concealed valve and low pressure slide rail kit (wall outlet included)
- Concealed valve and high pressure fixed head kit
- Concealed valve and low pressure fixed head kit
- All items available in gold or chrome

Code: U80197/U80195

Concealed valve, high/low pressure c/w rigid head – chrome

## Thermostatic Mixer Showers

Sirrus Thermostatic shower mixers are designed to reflect the growing demand for sophisticated and stylish showering systems. Easy to install (to new or existing pipework) and operate, with separate temperature and flow controls.

### Sirrus Phoenix

- Single control
- Exposed/Concealed Variable Kit

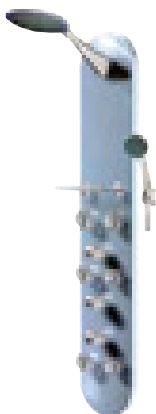

Code: \_\_\_\_\_ U88644

### Sirrus Bar Mixer

- Exposed Variable
- C/W Rub clean kit
- Easy fix kit

Code: \_\_\_\_\_ U85595

### Sirrus Corvus Column

- Power Shower

Code: \_\_\_\_\_ U88649

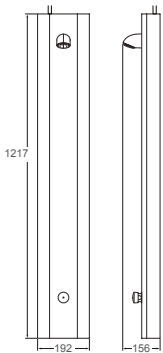

## Showers - Timed Flow Shower Controls

### Rada PA-TF

- Pre-plumbed shower panel with push button timed flow control & vandal resistant shower head
- Concealed pipe-work which protects users from high surface temperatures
- Long, sleek design – suitable for all ages and abilities
- Robust & durable materials used throughout
- Easy to install and maintain - Integral isolator & flexible connection provided
- Satin stainless steel finish
- For connection to pre-plumbed water supply

Dimensions (mm)

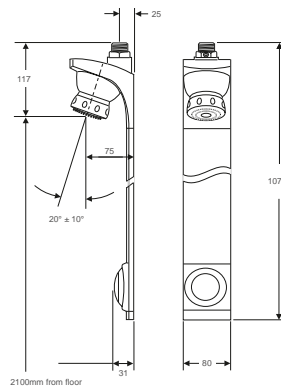

### Rada-presto PA-400s shower panel

- All in one shower panel
- 30 second timed flow control (adjustable flow rate)
- Security feature (shuts off water if timed flow is held down)
- Minimal maintenance
- Ideal for group showering applications
- Excellent water saving benefits

Dimensions (mm)

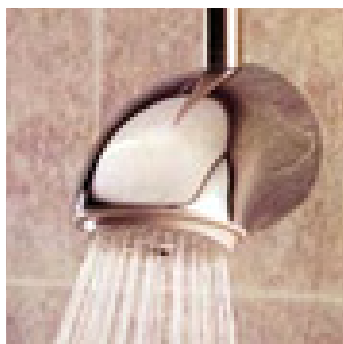

## Shower Fittings

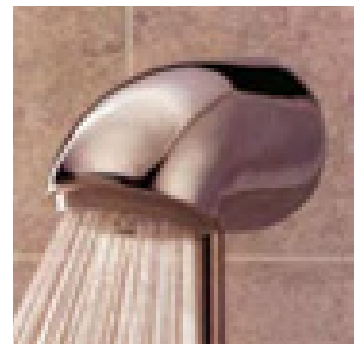

### Triton AS2000

VR105

VR125

VR150

## Vandal Resistant Shower Heads

### Three options available

- ConcealedUR105
- Exposed with pipe from topUR125
- Exposed with pipe from bottomUR145
- Each head has a sprayplate and a 9 l/min flow regulator
- Spray angle can be set from 18.5o to 24.5o from vertical
- Exposed head comes complete with riser pipe
- Minimum flow rate to activate fully formed spray is 4.5l/min

# Manual Mixer Showers

## Mira Gem

The Mira Gem is a superbly engineered mixer shower which gives you all the advantages of Mira quality, performance and reliability at a modest cost.

### Mira Gem BIR

- Mira manual mixer built-in concealed pipework c/w rigid head
- Independent spray force and temperature selection
- 15mm supply pipes to shower unit
- Valve constructed from corrosive resistant brass
- Can be used on a gravity or pumped system

Code : U81239 - All Chrome

### Mira Gem EV

- Mira manual mixer exposed c/w 360o swivel inlet connectors
- 15mm inlet connectors to shower valve
- Inlet supplies: hot, left; cold, right; outlet, bottom
- Can be used on a gravity or pumped system

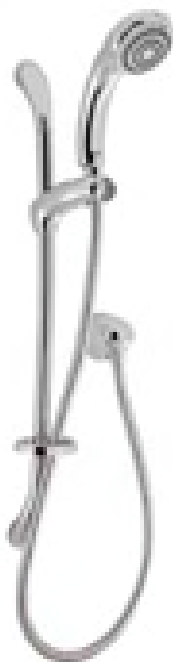

Code : U81237 - All Chrome

### Mira Gem BIV

- Mira manual concealed mixer c/w variable riser rail
- Independent spray force and temperature selection
- 15mm supply pipes to shower valve
- Valve constructed from corrosive resistant brass
- Can be used on a gravity or pumped system

Code : U81238 - All Chrome

## Sirrus

The ultimate collection from Sirrus represents the very best in performance showers available today encapsulates a number of discerning features.

### Sirrus Cumulus Exposed

- Manual exposed mixer
- Ceramic Disc
- Shower kit separate

Code: U12366 - All chrome

### Sirrus EVK/BIV Shower Kit

- Exposed
- Variable

Code: D61600 - All chrome

### Sirrus Cumulus Concealed

- Manual concealed mixer
- Ceramic Disc
- Shower kit separate

Code: U12367 - All chrome

### Sirrus Fixed Dual Spray Kit

- Concealed and Rigid

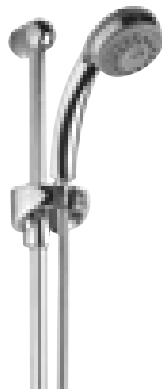

Code: U21594 - All chrome

### Sirrus EV/BIV Shower Kit

- Concealed and Rigid

Code: U21594 - All chrome

## Shower Valves - Timed Flow Shower Controls

**Rada 320C**

- 3/4" thermostatic mixing valve incorporating check valves, filters and isolating valves
- Valve body is D2R brass and features an adjustable / lockable temperature knob
- It also has a pre-set maximum temperature stop
- Connections are as follows: hot left / cold right outlet mixed top
- Mixed temperature water can be pre-set between 35oc + 45oc

**Rada 425-T3C**

- 1" thermostatic mixing valve approved as "type 3" valve for use in all UK healthcare premises
- Ideal for large group showering installations
- Unbeatable thermostatic control at low flow rates
- Valve comes supplied with strainers, check valves & integral isolators
- Easy to install with 28mm adjustable compression fittings

**Rada TF503**

- Exposed push button valve option
- Robust chrome plated press action shower valve
- The valve will automatically turn off water after approx 30 seconds
- The full cycle is re-activated each time button is pressed
- Very much a vandal resistant valve & ideal for groupshower installations
- 15mm inlet & outlet to and from push button valve

**Rada TF503B**

- Concealed push button valve option
- Robust chrome plated press action shower valve
- The valve will automatically turn off water after approx 30 seconds
- The full cycle is re-activated each time button is pressed
- Very much a vandal resistant valve & ideal for group shower installations
- 15mm inlet & outlet to and from push button valve

# Shower Pumps

Stuart Turner Ltd., has been a leader in the manufacture of booster pumps since the turn of the century. Their products have gained an unrivalled reputation for innovative design and absolute reliability. Stuart Turner booster pumps are firmly established in the consumer market where they provide power behind garden fountains, waterfalls and domestic showers.

## What You Need To Know About Automatic Pumps

Pump operation may be controlled by one of three different types of switches

- Flow switch is activated by a flow of water, turning the pump on automatically as soon as the terminal fitting is operated.
- Pressure switch turns on pump in response to changes in water pressure within the system.
- Air switch enables the user to switch the pump on and off remotely by means of an impulse of air along a tube.

**Monsoon ST55 1.4 bar twin pump PVC body**

Code: U11001

**Monsoon 1.8 bar showermate pump PVC body**

Code: U22872

**Monsoon 3 bar shower pump brass body**

Code: U11330

**Monsoon 4 bar shower pump brass body**

Code: U11331

**Monsoon Contract M330 1.5 bar negative head pump brass body**

## Product Information

It is common practice for shower enclosure walls to be tiled down to the top rim of the tray, please check that this is the case with your shower installation. Our shower doors are sized to fit opening that are tiled to the top rim of the tray and not behind.

Our Surety Corner Entry, Quadrant and Slider doors feature fully adjustable profiles to allow for door alignment to allow for door alignment (see images A,B & C above). The compensating profile for out of true walls will extend up to 25mm on each side.

Our Surety Corner Entry, Quadrant and Slider doors feature a unique door

mechanism which allows you to clip off the bottom runners for cleaning to clip off the bottom runners for cleaning (see image D above).

We in Heat Merchants are so confident about the quality and reliability of our products that we guarantee them against faulty materials or workmanship, provided that they have been installed, cared for and used in accordance with the manufacturers instructions. This range of shower enclosures comes with a 5 year guarantee.

We recommend that all shower doors are installed by a professional fitter.

Size: 700(L)x335(D)x840(H)mm

Gravena 1TH basin Code: U11026  
Size: 750(L)x480(D)mm

Rio basin mixer Code: U88621  
c/w spring waste

## Gravena 630

Polo unit Code: U22483  
Size: 630(L)x300(D)x840(H)mm

Gravena 1TH basin Code: U22484  
Size: 630(L)x420(D)mm

Rio basin mixer Code: U88621  
c/w spring waste

## Gravena 550

Polo unit Code: U26627  
Size: 520(L)x300(D)x840(H)mm

Gravena 1TH basin Code: U26628  
Size: 550(L)x420(D)mm

Rio basin mixer Code: U88621  
c/w spring waste

Combi 630 Code: U22482  
Cabinet

See page for mirror cabinet details.

## Gravena 850

Polo unit Code: U11072  
Size: 810(L)x335(D)x840(H)mm

Gravena 1TH basin Code: U11025  
Size: 850(L)x480(D)mm

Rio basin mixer Code: U88621  
c/w spring waste

Danubio 850 Code: U11049  
See page for mirror cabinet details.

## Gravena 1050

Polo unit Code: U22480  
Size: 1005(L)x335(D)x840(H)mm

Gravena 1TH basin Code: U22481  
Size: 1050(L)x480(D)mm

Rio basin mixer Code: U88621  
c/w spring waste

Vienna 1050 Code: U22479  
Mirror

See page for mirror cabinet details.
