

BIFOLD DOOR

INSTALLATION GUIDE

Size	Product code	Adjustment	Opening space
700	A1200A0	650-690	400
760	A1200B0	710-750	460
800	A1200C0	750-790	500
900	A1200D0	850-890	600

ATTENTION

If you install the product in a way that differs from this manual this will void all guarantees. Before installation check that the product meets all your requirements and is not damaged. By proceeding with installation, You accept the condition of the product. The wall plugs supplied with the installation kit are for use in solid walls. Hollow or 'stud partition' walls will require alternative fixings. Please consult your local hardware supplier for the correct type.

PH2

Please ensure your tray is 100% level in all directions before you fit your enclosure.

1

Determine your step in from the edge of the tray. Measure your x and y dimension. Your measurements must fall within the below table of adjustments marked as X.

Level your wall profiles and mark the points of fixing.

CODE	X
A1200A0	650-690
A1200B0	710-750
A1200C0	750-790
A1200D0	850-890

2

When fitting a fully framed product into a recess you must push the wall profiles onto the uprights. This is done as fixing the wall profiles first in a tight recess may lead to difficulty later when fitting the door.

3

When the enclosure is between your two walls you can then fix your wall profiles to the walls using the fixing screws provided. Equalise the gaps on either side of the upright profiles and fix using 2SY50.
