

FF15WAC

FULLFLOW

FULLFLOW radiator valves are designed and manufactured to meet the requirements of commercial installations. They feature a non-rising spindle, double EPDM 'O' ring gland seals with an additional 'O' ring back seating arrangement, this enables the FULLFLOW valve to be serviced without the requirement for draining the system, perfect for commercial applications. The range includes compression and screwed iron connections, as well as drain off options. Straight and angle versions are also available.

FF15LACD

DIMENSIONS

Wheel Head

15mm & 1/2"/22mm & 3/4" Angle

15mm & 1/2"/22mm & 3/4" Straight (for horizontal mounting)

Model	A	B	C	D
	(mm)	(mm)	(mm)	(mm)
15mm & 1/2" Angle	55.5	39.0	54.8	40.0
22mm & 3/4" Angle	56.0	45.2	61.1	40.0
15mm & 1/2" Straight	69.0	47.0	47.8	40.0
22mm & 3/4" Straight	72.1	54.5	54.1	40.0

Lockshield

15mm & 1/2"/22mm & 3/4" Straight (for horizontal mounting)

15mm & 1/2" Angle with Drain Off

Model	A	B	C	D	E
	(mm)	(mm)	(mm)	(mm)	(mm)
15mm & 1/2" Straight	62.0	47.0	47.8	34.0	-
22mm & 3/4" Straight	65.1	54.5	54.1	34.0	-
15mm & 1/2" Angle/Drain	52.5	39.0	54.8	34.0	30.0

NB: All measurements are nominal.

GENERAL SPECIFICATION

- CERTIFICATION**
Produced under a quality management system - ISO 9001:2008. Conforms to BS 2767-10.

OPERATING PRESSURES
Tested to a maximum pressure of 10 bar.
- GUARANTEE**
2 year guarantee from date of purchase against manufacturing defects.

OPERATING TEMPERATURE
Maximum 120°C.
- COLOUR**
Finished in polished chrome or brass.

DELIVERY
2 - 5 working days.
- CONNECTIONS**
Compression or screwed iron.

For more general information, please see page 250.
