### 3. Product Details

Classi-seal is a flexible, self adhesive waterproof upstand which is used around baths and shower trays.

Classi-seal is manufactured from EPDM (ethylene propylene diene monomer) rubber with a butyl based rubber adhesive layer on the rear. The adhesive layer is protected with a cover paper.

### 4. Product Use

The product is supplied in a variety of roll sizes. The backing paper is peeled off 100 mm at a time and the exposed adhesive is stuck to a clean dry wall surface, until all gaps have been sealed. The product is then cut to length using scissors or a knife blade with a maximum cutting depth of 3 mm.

## **5. Health and safety Information**

Users should cut the roll to length using scissors or a knife blade with a maximum cutting depth of 3 mm.

There are no known health effects from contact with the EPDM rubber or the butyl based rubber adhesive layer.

The rubber and adhesive are not classified as hazardous to health under the Chemicals (Hazardous, Information & Packaging) Regulations 2002.

## **6. Environmental Information**

The rubber and adhesive are not classified as hazardous to the environment under the Chemicals (Hazardous, Information & Packaging) Regulations 2002.

Wastes from the use of this product are not classified as hazardous under the European Waste Inventory.

## **7. Other Information**

The data given here is based on our current knowledge and experience. Information is provided without obligation or warranty as to the product's suitability for the intended use. Users should ensure that the product is of the appropriate quality to meet their requirements.

If any person has any information to the contrary or discovers any health or safety issues with the use of this product please contact the manufacturer immediately.
