SANITARY EQUIPMENT SPECIALIST

> **Water saving:** The universal dual flush siphon with a large section of flush volume settings allows the end users to save water.

> **Easy fit:** The height of the siphon is adjustable from 7 1/2" to 10 1/2" which is the widest range on the market.

> **Compact:** The unique compact design of the siphon allows it to fit into all lever operated cisterns that are currently on the market.

> **Water sealed:** A unique seal provided by the cistern water eliminates the use of traditional washers.

> **Unique:** The dual flush siphon is designed with a unique flapper system that replaces the traditional diaphragm washer.

> **Adaptability:** Fits all lever operated cisterns that are currently on the market thanks to its many adjustable features.

> **Installation video:** Visit the Wirquin YouTube channel to watch our video about the award-winning MACDEE MOTION.
